Therapy**Description**

Clear colorless solution

Classification(s)**Disease State(s)****Instructions****A. Calculations/Special Considerations:**

Prepare in a well ventilated area

Measure Hydrochloric acid with graduated glass pipet

B. Equipment Required:

graduated glass pipette, gradated cylinder, beaker

C. Method of Preparation:

1. Calculate required amounts and fill out compounding log

2. Measure out ingredients

3. In an appropriate size beaker, add distilled water. Use an amount that is approximately 50% of the final volume.

4. Using a clean, dry graduated glass pipette withdraw the Hydrochloric Acid from the bottle and add the to the distilled water in step 1.

5. Rinse the step 2 pipette with a small amount (~10% of final volume) of distilled water and combine in step 2 beaker. Rinse the pipette a total of three times

6. Bring step 3 to the final volume with purified water and mix thoroughly

7. Have compound certified pharmacist perform final verification

8. Label with lot number and expiration barcode

D. Labeling:

Label with lot number and expiration barcode and ingredient(s) label.

E. Description of Finished Product:

Clear colorless solution

F. Quality Control Procedures:

Physical appearance of compound verified by compounding certified pharmacist

Volume of final product is within 5% of intended batch size

Pharmacist signature: _____

G. Packaging Container:

None

H. Storage Requirements

To be used immediately for metronidazole 1% topical solution

Maximum BUD - 30 days
